Solutions for All Phases of Facility Care

## NO-TOUCH DISINFECTION: *Safeguarding Your People & Places*

### OVERVIEW

Imperial Dade has partnered with leading manufacturers to provide the latest in disinfection technology through the use of state-of-the-art electrostatic spray equipment. This technology, when coupled with an appropriate disinfectant that is both safe and effective for electrostatic spray application, can help facilities provide healthy and hygienic environments for the public they serve.

### BENEFITS

- Reduced absenteeism during cold and flu season, as well as enhanced protection during other outbreak situations.
- Control of infections and illnesses through the thorough and effective disinfection of all frequently touched surfaces.
- Enhanced customer image and safety.
- Mold and odor control in areas where moisture and malodors pose problems and ongoing concerns.

### FEATURES

- Electrostatic technology applies disinfectant up to 75% faster, uses up to 65% less chemical, provides better and more uniform coverage, and can achieve required disinfectant dwell times.
- Lithium ion batteries allow for disinfection of all areas, including offices, classrooms, stairways, gyms, resident rooms, cafeterias, and other public spaces. Backpack and handheld options are available.
- Disinfectants are EPA Registered and are on the List N for products effective against SARS-CoV-2 coronavirus as well as having efficacy against a wide range of bacteria, fungi, and viruses, including Influenza MRSA, Norovirus, and other pathogenic organisms.
- Ranging from easy-to-dispense peroxide concentrates to inexpensive chlorinated tablets to convenient, ready-to-use products, disinfectant options are available to meet the infection prevention needs of any facility. Many are even approved for incidental food contact.

### EXPERTISE

Imperial Dade is well-equipped to provide support to all facilities interested in taking their disinfection efforts to the next level. Our knowledgeable staff, and our ability to provide effective in-service training allows for effective and economical disinfection programs and, ultimately, healthier and safer indoor environments.

*Going Beyond Clean for All Environments!*
